ANOTHER
Project

The Boundary Seating system is an accumulation of our learnings over many years in the commercial environment.
A multipurpose system, Boundary offers three integrated table types and new, varied module shapes to enable a variety of uses.

Designed by Another Project around an upholstered plinth, which conceals its adjustable feet and houses all soft-wiring requirements. Boundary is easy to assemble, tables are inset into the sofa, and configurable for different requirements.

The steel Stem table suits either laptop or cafe sized tops, while the upholstered table base can be fitted with discreet, rear-facing soft-wiring options for agile working in various environments.

Multi-layered foam and carefully considered dimensions provide excellent user comfort, making the Boundary ideal for office collaborative for focus areas, public spaces, canteen and hospitality settings.
