SIMON JAMES

The Fragment collection by Simon James draws inspiration from modernist architecture, balancing strong geometric lines with the warmth and tactility of solid timber. From certain angles, the tabletop appears to cantilever, creating a subtle sense of movement within its refined, minimal form.

Created specifically for commercial environments, the Fragment Meeting Table combines architectural form with everyday functionality and is designed to accommodate a variety of workplace settings. Seamless integration of softwiring further enhances its suitability for contemporary office spaces.

Available in various sizes and finishes, including larger custom sizes on request.

Made in New Zealand.
